

## Leonardo Mechanograph<sup>®</sup> Kiosk Bundle

System for application in fitness gyms directly by the end user without need for additional personell. The Kiosk Bundle includes in addition to the Leonardo Mechanograph GRFP PRO force plates a 23" touchpanel controller and an RFID reader.

Including Leonardo Mechanography v4.4 Kiosk software with the intuitive user interface allowing even end users to use the software without the need for additional personell.

Without additional personel, the customer can generate himself comprehensive information about various aspects of his own fitness-level and personal development. Based on these results his training goals and training intensity can be adapted and optimized.

TECHNICAL DATA	
Type number	9N60070002
Classification	Human
Training area dimensions (l/w/h)	26 x 26 x 3 in
Overall dimensions (l/w/h)	67 x 38 x 46 in
Weight of device	66 lbs
Total weight	231 lbs
Force sensors	8
Sampling rate per sensor	1000 Hz
ADC resolution	16 bit
Max. force per sensor	ca. 2 kN
PC Interface	USB 2.0, USB 3.0
Seperated platform	No
Option and accessories	None
